Finding Your Leadership Focus: What Matters Most for Student Results
by Douglas B. Reeves
Addressing one of today’s major challenges—an ever-growing load of programs and initiatives that not only tax leadership resources, but actually hurt student performance—the author provides explicit guidelines for improving your most critical leadership decisions by simultaneously engaging in three essential strategies: monitoring teaching and leadership practices, building high degrees of efficacy among staff members, and focusing on a smaller number of priorities. Essential reading for new and veteran principals, teacher leaders, and PLC book study groups.
“This book is a masterful combination of research and practice, and Doug Reeves ... has added much-needed clarity to the process of leading in a way that directly results in enhanced student achievement.”

Closing the RTI Gap: Why Poverty and Culture Count
by Donna Walker Tileston
Learn why RTI is so important and how to successfully implement it in your school, particularly in the context of poverty and culture. Rather than waiting for student failure, misidentification of special needs, or disproportionate ethnic representation, schools that implement RTI improve their chances of ensuring that all students achieve high levels of learning.

Implementing RTI with English Learners
by Douglas Fisher, Nancy Frey, and Carol Rothenberg
In this book, you’ll find an approach that every teacher can use to ensure that English learners access the core curriculum and achieve at high levels. The approach is based on the RTI model, which enables teachers to identify and support students’ diverse learning needs. The authors situate their examples in a PLC context and share vivid dialogue from team meetings in which teachers discuss their students, work out the best ways to help them overcome their difficulties, and share their successes.

Supporting Differentiated Instruction: A Professional Learning Communities Approach

by Robin J. Fogarty and Brian M. Pete

This book will shape schools into professional learning communities that support differentiated instruction. It pragmatically approaches the collaborative spirit of professional learning communities (PLCs) and the rigorous work of differentiated classroom instruction. Teachers need a roadmap to guide them in fostering differentiated instruction from the PLC to the K-12 classroom. Using the PLC approach to differentiate instruction, they can achieve their target concern: student success.

Differentiation and the Brain: How Neuroscience Supports the Learner-Friendly Classroom

by David A. Sousa and Carol Ann Tomlinson

The authors examine the basic principles of differentiation in light of current research that offers information and insights that can help educators decide which curricular, instructional, and assessment choices are likely to be most effective. They suggest how to establish and manage differentiated classrooms without imposing additional heavy burdens on teachers who teach differently and smarter, not harder.

“This excellent, must-read resource fills in a necessary piece for supporting differentiated instruction using professional learning communities.”

The Highly Engaged Classroom
by Robert J. Marzano and Debra J. Pickering
The best learning comes when students are engaged. Using the suggestions presented in this book, every teacher can create a classroom environment in which engagement is the norm. Specifically, it addresses four emblematic questions students ask themselves, the answers to which determine how involved they are in classroom activities: How do I feel? Am I interested? Is this important? Can I do this? Three chapters are devoted to providing specific strategies for addressing these questions.

Vocabulary Games for the Classroom
by Lindsay Carleton and Robert J. Marzano
Strong vocabulary is a vital foundation for academic subject areas. Unfortunately, learning vocabulary is not always enjoyable or easy for students. The authors, however, have devised a way to make this important instruction something both students and teachers look forward to, using 13 games designed to build academic vocabulary. While these games are certainly fun, and teachers should capitalize on the energy and excitement they generate, they should also be seen as one part of a systematic approach to direct vocabulary instruction.

Formative Assessment & Standards-Based Grading
by Robert J. Marzano
Here’s everything teachers need to know to implement an integrated system of assessment and grading that will enhance both their own teaching and their students’ learning. Much has been written about the benefits of formative assessment, which is assessment used during instruction rather than at the end of a course or unit, but mostly in general terms. Marzano explains how to design and interpret three different types of formative assessments, how to track student progress, and how to assign meaningful grades, even within a traditional grading system.

Raising the Bar and Closing the Gap: Whatever It Takes
by Richard DuFour, Rebecca DuFour, Robert Eaker, and Gayle Karhanek

The authors propose that a professional learning community should be able to say "yes" when asked the following two questions about students experiencing difficulty: Is the response intervention quick or directive? Are school-wide response systems in place? Throughout the book, the authors explore the role that administrators play in implementing frameworks and strategies to improve academic achievement in their learning communities.

Building a Professional Learning Community at Work: A Guide to the First Year
by Parry Graham and William M. Ferriter

Addressing the real-world critical questions that arise when schools begin their work to become professional learning communities, this book looks at how administrators and teachers can turn the promise of a PLC into reality and how school leaders can transform theories of collaboration into highly effective nuts-and-bolts practices. Set in the context of one year in the life of a PLC, it chronicles the efforts of a building principal and his teachers to build a true PLC by focusing on the successes and challenges inherent in the process.
