

Dr. Jeff Kelly

Upson-Lee Middle School
Thomaston, Georgia

Response to Intervention Program is vital to our school's success. The foundation of this program is building positive relationships with our students. It's about focusing on an individual student and with the student's help, developing strategies to help the student. We focus on the whole child and not one specific area. We developed a team that includes teachers, administrators, counselors, and behavior specialists to tackle struggling learners and to help them succeed.
